Title: **Small Change Big Purpose**

Abstract: These past two years, we have witnessed something smaller than 5 micrometers (10-6) per single droplet impact humanity profoundly. Why? Because, small is all. The large manifested itself in the small since matter and energy interconnect to create the large. So it is, in this fantastic world of almost 8 billion people, you have control over things that may seem tiny, but you are interconnected to all. In our keyshop (keynote + workshop) rediscover your agency through an interactive keynote where we uncover strength through weakness in our personal and professional selves, providing a powerful emergence of purpose.
